DIRECTORS' REPORT

Dear Members,

Your Directors have pleasure in presenting their report with the audited accounts of your company for the year ended 31st March, 2004.

FINANCIAL PERFORMANCE

The Annual Accounts accompanying this report are self explanatory and provides the overall picture of the financial operations during the year.

DEVELOPMENTS

A. POWER GENERATION

Your Company is setting up a renewable fuel based power project of gross operating capacity of 25 MW, of which the first phase of 5 MW is already commissioned. The project site is located at Village Belgundi near the city of Belgaum in Karnataka. Karnataka, like many other States, has been a power deficient state, estimated to have a shortfall of over 3000 MW. This prevalent crisis was the driving force behind the present quest of the promoters who have been constantly addressing the issue of inadequacy of power supply in rural India. This endeavor, at the grassroots level, empowers the rural farmer by buying his agro-waste, while guaranteeing him quality power.

GEL is the first company in India to have signed a Memorandum of Understanding with a gram panchayat to supply power. GEL has entered into a 30 year power purchase agreement with the KPTCL. As per the agreement, the company's capacity for a minimum of 4000 hours is committed to KPTCL. The balance power is to be supplied to nearby villages and rural industries. This was the first project of its kind in the country to be built on the IPP concept with agro-waste as the primary fuel and having a PPA with KPTCL under the then newly liberalized power policy. This plant has been designed to accept over 17 different types of agro fuels ensuring a relative stability of fuel price.

The trial production of the 5 MW Power Plant was successfully carried out on 28th October, 2003. The company has not accounted for income receivable from KPTCL since the matter is Sub-Judice

B. POWER TRADING

GEL and its group companies are frontrunners in implementing the concept of energy trading using the "Wheeling & Banking" Scheme of the Government of Karnataka in 1986. Over the past several years, the company has purchased power from industrial undertakings with surplus power (captive and co-generation) and marketed it to other industries which have additional power requirements.

Global Energy Ltd. is now very active in the area of power trading and is in contact with a number of utilities in the country for sale and purchase of power on infirm and firm basis. It is trying to create a dynamic market for power by way of arbitrage of the supply-

demand mismatch in different regions and states of the country. It is also developing various mechanisms including financial and physical products for energy trading.

GEL is the first independent power trading company in India to actually enter into an arrangement to trade/schedule power in 1994. After the notification of the Electricity Act 2003, Global Energy entered into transactions to supply power to the State of Delhi from the southern region, creating a record of trading power across three different regions.

Having already traded in excess of over 160.91 million units of power in the country, GEL's past and present trading activities extend across all the five electricity regions in India. GEL is also the first trader to schedule power from a private producer (TATA Power) to customers in other regions. GEL also holds the distinction of having scheduled power through all the five electricity regions in a single transaction (Tripura to Haryana). Some of our important customers are, Haryana Vidyal Prasaran Nigam Ltd, Tripura Power Department, Goa Electricity Department, Delhi Transco Ltd, Kerala State Electricity Board, Tata Power Company etc.

INVESTMENT

During the year your Company promoted India's first online spot electricity exchange India Electron Exchange Limited offering real time scheduling and settlement services by investing a sum of Rs. 1.30 crores. The exchange is also supported by State Governments, with a technology platform provided by Triple Point Technologies Inc. USA and settlement services by India's leading Banks.

Approach & Methodology

GEL and its associate companies are in reality, the first private power traders in the country, having traded power as early as 1986 through the "wheeling & banking" scheme of the Government of Karnataka. GEL has already conducted trades of over 300 million units of power across all the five electricity regions in India. GEL is the first trader to schedule power from an embedded private power producer to customers in other regions and also holds the distinction of having scheduled power through all the five electricity regions in a single transaction.

Global Energy Limited (GEL) understands and appreciates the fact that efficient execution of electricity trading in a competitive environment will ultimately benefit consumers. In the spirit of the open access regime brought about by the Electricity Act, 2003 and subsequent CERC & SERC regulations, GEL shall strive to offer consumers the choice of seller and price. GEL's endeavour shall be to facilitate trading of quality power at the least possible price, by creating a network of buyers and sellers across the country. GEL aims to be a one-stop source for any generator / utility / consumer wanting to buy / sell power in the country and contribute to the evolution of a robust and competitive electricity market in India.

GEL shall focus primarily on short-term customers, identifying potential buyers and sellers, to address seasonal and regional variance of demand and supply. GEL shall attempt to minimise off-take risks of selling systems by sourcing alternate/default buyers. GEL shall endeavour to aggregate surplus capacities of small & medium power generation units in order to establish a sustainable trading system, which allows for purchase and supply of power at 'true' market prices. GEL's trading activities shall be through appropriate secure commercial contracts, with necessary financial security mechanisms to minimise risk to both buyers and sellers.

Over and above existing facilities, GEL shall develop internal systems for market research, forecasting and management like load forecasting, load management, weather based load curve estimation, risk mitigation etc. By effectively deploying such systems, GEL aims to anticipate future demand / supply mismatches and fulfill customer requirements.

GEL already has a fully functional trading desk and the necessary organisational capabilities to efficiently carry out activities related to the trading of power, with adequate office infrastructure with state-of-the-art communication facilities, computer systems and support personnel. The Rajasthan operations shall be coordinated from GEL's office and control room in New Delhi initially and local establishments set up in Jaipur or other locations in Rajasthan as per requirements later. While GEL currently has the
